The BL1860B replacement for Makita 18v Battery. Product Specification: Battery ...

Most 2018-2021 Model 3s and 2020-2021 Model Ys (manufactured through May of 2021) use a 12V lead-acid battery, and you can upgrade them to an aftermarket Lithium Ion battery. Again, because Tesla's OEM low voltage Lithium-Ion battery is a 16V system, these batteries cannot replace the older 12V lead-acid batteries.

Before jumping in on a lithium upgrade, I'd check the functionality of your existing system. Battery health, generator output, solar charge controller settings, loose/corroded cable connections etc. etc. Because if your DC charging is not optimal, you'll have the same issue with LiFePO4 batteries. _____ Be creative, and have a fun life.....and don't be an @**hole! ...

I want to upgrade the lead acid battery to a lithium one. Does anyone know if I need to make any other changes to do this swap. By the way I dry camped in the desert one night in the desert on its first trip. The heater ran and some lighting along with residential fridge all night. About sunrise the low battery chime sounded. I was on the single battery it came with. 01-31 ...

The idea is to upgrade this battery by changing all cells with LG HG2 18650 cells which have 3000mAh of capacity. So I'll get 3Ah 18V battery at the end. The second reason of this upgrade is, that all cells are dead.

Up grading from lead acid to lithium batteries on our Class C motorhome and Casita camper were both straightforward DIY drop-in replacements. Let's start with an overview of the benefits of lithium batteries in RVs. Then, we'll cover each battery upgrade, including power data, battery specs, gear used, the cost, and the time it took.
