Though the average lifespan of a car battery is typically 3 to 5 years, replacing it every 2 years may be considered more frequent than usual. The need for a new battery within this timeframe could be influenced by factors such as extreme driving conditions, excessive electrical demands, or issues with the vehicle's charging system.

Value: 1 year warranty; Plus: 2 year warranty; Maxx: 3 year warranty + 2 year prorated warranty; The Maxx with its 5 year total coverage gives you the most protection, but also costs the most upfront. The cheaper Value and Plus may still be suitable for some drivers. Here's how the Everstart battery warranties compare to top competitors:

The 2-year lifespan for car batteries is a misconception based on outdated information. With proper maintenance and care, many batteries can last significantly longer. Factors such as driving habits, battery type, and environmental conditions play a more significant role in determining battery lifespan than an arbitrary two-year limit.

ValuePower(585 cca)- 1 year for \$49.88; EverStartPlus (650 cca)- 2 year for \$74.88; EverstartMaxx (750 cca)- 5 year (3 years free replacement then 2 years pro-rated) for \$93.76 *a note on cold-cranking amps, a new
