

Why is aluminum a good battery enclosure material?

Aluminum has a layer of oxide on top that prevents any corrosion. Aluminum battery enclosures are highly popular for all designs of cabinets and cases because aluminum is lightweight. This material is especially good for battery enclosures exposed to solvents, petrochemicals, some acids, most sulfates and nitrates.

Which aluminium sheet is best for a battery enclosure?

Constellium provides 3xxx, 5xxx, and 6xxx aluminium sheet solutions for battery enclosures, including the clad cooling plates that help maintain batteries in their optimal temperature range.
