

Are Chinese capacitors expensive now

Yes, there are a few decent electrolytic capacitors from china. I think ones like Teapo SC/SEK are good and OST RLS is not bad. But if you get them from Aliexpress/eBay then chances are you will be getting some fakes, ...

For the small values COG ceramic capacitors are working very well. The average COG cap is more stable than the film capacitors and the losses are about on par with PP or PS. Good ones can even get lower loss - on par with exotic PTFE capacitors.

He said they use better capacitors in the power supply now, which my player did not have. He said everything else has stayed the same since the player was first introduced. He said they install these power supply caps on any 840Cs returned for repair, normal practice. So evidently I have these new capacitors now installed. Sounds great. See also :

In 2023, the Chinese capacitor market decreased by -75.5% to \$31.7B, falling for the fifth consecutive year after two years of growth. Over the period under review, consumption, however, continues to indicate a deep setback. Over the period under review, the market hit record highs at \$227.6B in 2013; however, from 2014 to 2023, consumption ...

Capacitor lead times continued to weaken in September 2022, clearly showing a global economic recession in the high-tech economy. Capacitor raw material prices also continue to relax back down for all key metals, except for nickel and palladium.

For the small values COG ceramic capacitors are working very well. The average COG cap is more stable than the film capacitors and the losses are about on par with ...

Good capacitors (Solens and such) aren't expensive, why use an unproven product from China? I don't understand some peoples reasoning, so they're 19 cents instead of 1.25?

The objective of this article is to provide detailed information about the most crucial part of a personal computer (PC) system, its power supply unit. Follow us on this journey into PSU territory ...

In 2023, approx. 1,696B units of electrical capacitors were imported into China; picking up by 2.2% against the previous year's figure. Overall, imports enjoyed a prominent increase. The most prominent rate of growth was recorded in 2020 with an increase of 92% against the previous year.

I didn't work with Illinois Capacitor, Elna, Cornell Dubilier enough to recommend them or say they're OK. And to be honest, they're not worth my time to experiment, since what Farnell has it's too expensive

Are Chinese capacitors expensive now

compared to these other popular common brands. ps Yes, UCC KZG and KZJ are faulty, have issues. Same with Nichicon HM series from 2004 ...

S Prague Atom are good too but they are expensive and big. Reactions: 5F6-A. gunslinger Member. Messages 5,345. Jul 12, 2019 #6 First of all I'd avoid Illinois filter caps. Second don't buy new old stock ones. The newer the filter caps the better. They're not like tubes/valves. Filter caps age just sitting on a shelf. From my very limited research F& T seem ...

Yes, there are a few decent electrolytic capacitors from china. I think ones like Teapo SC/SEK are good and OST RLS is not bad. But if you get them from Aliexpress/eBay then chances are you will be getting some fakes, yep fakes.
