Will a new Lithium Project churn out in Argentina?

Four new projects will finally begin to churn out lithium in the weeks and months ahead, according to a yet-to-be released federal government time-line seen by Bloomberg News. That will almost double production capacity in Argentina, whose growth potential has long lured the attention of battery makers around the world.

How many new lithium mines are there in Argentina?

For all the money that's poured into Argentina's giant lithium deposits, the country has seen just one new mine come on stream in almost a decade. That's about to change. Four new projects will finally begin to churn out lithium in the weeks and months ahead, according to a yet-to-be released federal government time-line seen by Bloomberg News.

Is Argentina's lithium a good investment?

At a lavish lunch this month in Buenos Aires, 400 mining executives and government officials gathered to toast Argentina's natural resource riches amid the kind of corporate giddiness not seen since the country's first attempt to develop its shale oil resources a decade ago. The attraction for investors this time around is Argentina's lithium.

Can millennial's lithium assets be mined in Argentina?

The three-way bidding battle for Millennial's lithium assets in Argentina lasted four months and included two Chinese suitors. Argentina "is the best lithium opportunity in South America," Evans said. Looming shortage of lithium, key for electric vehicles, gives Argentina a chance to become a mining mecca.

Will Argentina overtake Chile in lithium production in 2027?

Argentina will overtake Chile in lithium production around 2027, according to Daisy Jennings-Gray, senior analyst at Benchmark Mineral Intelligence, which advises governments on critical minerals. Lithium Americas Corp. and Ganfeng Lithium Co.'s Cauchari-Olaroz is likely to be the first new project to produce significant volumes in 2023.

Does Argentina export lithium?

Read more... Despite a flurry of prospecting and development, only three operations in Argentina currently export lithium. That's still enough to have established the country as a major producer behind Australia, neighbouring Chile and China. Of the three, only one is a newcomer -- Minera Exar, which is majority owned by Ganfeng Lithium Group Co.

The Argentine salt flats in South America's "lithium triangle" have been one of the busiest sites for ventures racing to extract the battery metal needed to power the global shift to electric...
