Battery Panel Screensaver

Select [System] (3), then select [Power & battery] (4). Expand the Screen and sleep option, then set as "On battery power, turn off the screen after [5 minutes]" (5) and "When plugged in, turn off the screen after [5 minutes]" (6). Back to ...

Via the screen saver/maintenance settings, it helps to avoid causing the "burn-in" symptom due to showing the same static and high contrast image for a long time, and also helps to optimize the maximize battery life and extend your laptop"s lifespan. (Some models may be set by default when manufactured.)

Armoury Crate and Panel Power Saver are terrible because you can"t even tell what is On/Off. Is red on or off? And then one of the options is blue. When you hover cursor, it tells you what the option does but you have no idea if the described thing is already active or if it will become active on a click. Therefore you don"t know if you should click it. This is why GUI"s that aren"t ...
