

Battery RV

How long do RV batteries last?

On average, a typical lead-acid battery can last anywhere between three and five years. Meanwhile, lithium-ion batteries, with their superior technology, often boast a lifespan of up to 10 years. But in the end, it's still going to come down to how you treat your battery. [How Long Should RV Batteries Last?](#)

What is a house battery in an RV?

House batteries are different from the RV's engine batteries as the house batteries are a "deep cycle" battery mainly designed to store substantial amounts of power. Such ability allows the battery to supply energy for a prolonged period of time, enabling long off-road trips.

How do I choose the best battery for my RV?

It's important to know the differences to choose the best type of battery to power your RV optimally. A flooded lead-acid battery is the most basic type of RV battery and can be used for house or chassis applications. As mentioned, the design of chassis/start batteries differs from deep-cycle house batteries.

Which RV batteries are best?

If you are looking at using 6V batteries, the Trojan brand has the best RV batteries. Trojan has been making great RV deep-cycle batteries for years. When using 6V batteries, we recommend using four batteries or more. You get the largest benefit by using 6V batteries if you are using more of them.

What is a lithium battery for RV use?

First, a lithium battery for RV use differs from the more generic "Lithium Ion" category of batteries. Those are known for offering very high power density in small packages and are used for battery-powered devices like laptops, tablets, cordless drills, etc.

Can you use a regular car battery in an RV?

You can use a regular car battery in an RV, but it is not recommended. They will not last for long periods, and they are made differently. Car batteries are not deep cycle batteries. They are made to use high amps for a short time. This is why they are used to start your car. RV batteries need to be deep-cycle batteries.

Deep cycle batteries for RVs are batteries that work best for consistent or periodic low amp draws. This is why they are used in RVs. Deep cycle batteries supply low amps over a longer time period in order to power ...

Deep cycle batteries for RVs are batteries that work best for consistent or periodic low amp draws. This is why they are used in RVs. Deep cycle batteries supply low amps over a longer time period in order to power your appliances, lights, and a lot of the amenities you get from your RV.
