

Battery bottle packaging

What is battery packaging?

Our battery packaging complies with the current hazardous goods regulations and is specially adapted to your hazardous goods. Battery modules for lithium-ion batteries consist of several battery cells that are connected to each other. Their production takes place in automated assembly lines (partly under dry room or cleanroom conditions).

How do battery packaging solutions work?

They are additionally fixed via a cell frame. The solutions include workpiece carriers, containers and magazines. Our battery packaging can be made from conductive plastics and protects your sensitive components from dangerous electrostatic discharges (ESD). They are also suitable for semi-automated and fully automated handling.

What are automotive battery packs?

Our automotive battery packs fully encapsulate and protect the battery during shipment. The benefits of these battery packaging options include nesting capabilities for better return ratios, less storage space, and lower cost and weight than steel containers.

What is a battery transport container?

The transport containers are suitable for both individual battery systems and battery packs shipped in multiple layers. For optimum product protection, we develop the for you at the same time. Our battery packaging complies with the current hazardous goods regulations and is specially adapted to your hazardous goods.

How do you package a battery?

Each battery must be individually packaged in non-metallic packaging made of cushioning material that is non-combustible, non-conductive and absorbent. The individual packaging must then be enclosed in outer packaging. Outer packaging can be made from metal, wood, or plastic.

How can a battery system be shipped?

The appropriate battery packaging in the form of a hazardous goods and transport container for shipping the modules can also be obtained from us. We can also carry out the tests and inspections for hazardous goods approval for you on request. The key component of a battery system is the battery cells that store and release the energy.
