

Battery installation power display module

How do I install a display module?

Attach the logic module and communication module to the display module before panel installation. See the instructions shipped with each module. Allow adequate clearance around the terminal, inside the enclosure, for adequate ventilation. Consider heat produced by other devices in the enclosure.

How to install a battery module?

Use a torque of 6 N·m. 4.3 Pre-installation checks 4.3.1 Identifying model number Verify the model number of each battery module to ensure that they are all the same model. Installation 4.3.2 Measuring battery voltage Measure the voltage of each battery module. 1. Pull the groove to remove the cover from the power terminal compartment. 2.

How do I connect a battery module to a higher level system?

Insert one end of the cable into the RJ48 port on the lower part of each battery module, and insert the other end of the cable into the RJ48 port on the upper part of the module positioned below it. Installation 4.5 Connecting power cables Connect power cables between the battery modules and the higher-level system via busbars.

How do I replace the battery in the logic module?

Follow these steps to replace the battery in the logic module of any PanelView Plus terminal with a 700 to 1500 display. Disconnect power from the terminal. Disconnect all power and communication cables. Detach the communication module, if attached, from the logic module by removing the four screws.

How do I install a new battery?

Insert the new battery at an angle under the metal latch, with the positive polarity (+) facing up. Gently press down on the opposite side of the battery until it locks into place. **IMPORTANT** Make sure that the battery is fully inserted under the plastic tabs.

How do I reattach the logic module?

Remove the battery by lifting the side of the battery. Insert the new battery with the positive polarity (+) facing up. The battery can be removed for up to 15 seconds without losing the clock and calendar data. Reattach the logic module by aligning the logic module connector with the connector on the display module.

Page 2 About this manual This manual describes how to install and use EM048063P3S and EM048126P3S series battery modules by LG Chem. Read this manual before you attempt to install the product, and follow the instructions throughout the installation process.

4. Loosen the captive screws that secure the logic module to the display module and carefully lift the logic module away from the back of the display. 5. Locate the battery on the circuit board. 6. Remove the battery by
