

Battery label customization price

What is a custom battery label?

Custom battery labels are labels that allow you to include the exact information you need in the format and design that best fits your branding and safety requirements. You can choose from various label materials, adhesives, sizes, shapes, and colors to create labels that are durable, visually appealing, and suitable for your specific battery products.

What makes a good battery label?

When designing battery labels, it's essential to use high-quality materials that can withstand harsh conditions, including: Extreme Cold and Heat: Ensures labels remain readable and intact in varying temperatures. Chemicals and Abrasion: Protects against damage from chemical exposure and physical wear.

What is a customized battery?

A customized battery refers to batteries designed to meet the specific requirements of portable electronic devices and wearable devices. These batteries have unique shape, size, durability, and discharge rate demands. As consumers, we desire light and durable electronic equipment.

Why are battery labels important?

Battery labels are a crucial component of battery safety and compliance. With custom labels, you have the flexibility to include your brand logo, colors, and design elements that align with your brand image. This helps create a cohesive and professional look for your battery products, building trust and credibility among consumers.

How can etiquette systems help with battery label printing?

Etiquette Systems can help you with printing high-quality custom battery labels that meet regulatory requirements and enhance your brand's visibility. Contact us today to discuss your battery label printing needs.

What is battery safety and compliance?

Battery safety and compliance involve proper labeling. Labels on batteries provide critical information about the type, specifications, and usage instructions, ensuring safe handling, transportation, and disposal.

It also takes six AA batteries, which is a lot. We still feel that it's a good value though, with an acceptable level of portability and a good price for the features. Type: Handheld | Storage Capacity: 15 labels | Power Source: Six AA batteries | Max Label Width: 0.5 inches
