Lithium decreased 20,900 CNY/T or 21.66% since the beginning of 2024, according to trading on a contract for difference (CFD) that tracks the benchmark market for this commodity. Lithium - values, historical data, forecasts and news - updated on December of 2024.

This includes benchmark prices for lithium and cobalt, two battery materials that continue to experience market volatility and supply/demand imbalances. Our widely used prices are market-reflective, assessing both the buy- and sell-side of transactions.

Argus is at the forefront of battery materials pricing and reporting with coverage of common battery metals (lithium, cobalt, nickel, graphite), industry-grade cathodes and black mass. As experts in specialty metals and rare earths, we future-proof our price assessment portfolio with a range of electronic metals crucial to the manufacture of ...

Lithium-ion battery prices (including the pack and cell) represent the global volume-weighted average across all sectors. Nickel prices are based on the London Metal Exchange, used here as a proxy for global pricing, although most nickel trade takes place through direct contracts between producers and consumers. The 2023 battery price value is ...

Argus Battery Materials is the definitive resource for miners, refiners and consumers of battery materials - Delivering over 130 price battery price assessments, decades of historical data, forecasts for key battery metals and chemicals (including a 10-year demand outlook for the EV industry) and grants access to our bespoke Argus Metals ...
