

## Battery not fixed firmly

Why is my laptop battery not working?

While the cause of laptop battery errors can be rather mysterious, there are a number of ways to work out what the problem is and fix it. Plug in your laptop. It's possible the battery has simply run out of juice, so before you begin panicking, attach it to a power source. Wait for at least 15 minutes, then try turning it on.

Why is my battery not charging to full?

Battery not charging to full If you experience the problem which is The battery doesn't be charged when power level is above 95% with AC adapter connected. This is a normal condition for battery protection, not a problem for either the battery itself or the charging function. When the battery is charged to 100%, it will stop being charged.

Why is my laptop battery not charging?

No glowing lights, no brightened display, and no "battery charging" icon in the corner. When it comes to laptop batteries, there are multiple things that can fail. Some are easy to fix yourself with a software tweak or even a new battery, but other problems may require a visit to a repair shop or even a full-blown system replacement.

How do I fix a laptop battery error message?

Update the battery's device drivers to clear the error message. One way to do this is through Device Manager. From the Batteries section, right-click your laptop's battery name and select Update driver. Another method is to use a driver updater tool.

How to fix battery not charging problem Windows 10?

To see if Windows can fix the battery not charging problem, you can run the power troubleshooter. 1. In the search type "troubleshoot settings" and then click to open them from the search results. 2. In the 'Troubleshoot' window, select Additional troubleshooters. 3. Scroll down and click on Power.

Why is my battery not showing up in the BIOS?

The battery may be out of date and not showing up in the BIOS. However, check your ACPI settings first to make sure the battery is present. To do this, check your ACPI settings first: Right-click Start and select Device Manager. Click on ACPI to check the settings, as the battery may be on or off.
