Battery pack pcs

The BMS (Battery Management System) manages the bank of rechargeable batteries, preventing the pack from operating outside. The Battery Management System (BMS) is a core component of any Li-ion based ESS and performs several critical functions. The primary job of the BMS is to protect the battery from damage in a wide range of operating ...

The PCS is the "inverter" of the commercial system - converting electric between AC supply and DC battery packs, and synchronising with the grid when available
