Battery product code query

What is a battery date code?

Battery date codes are typically stamped on the top or side of the battery. The code consists of a letter and a number. The letter represents the month the battery was manufactured,while the number represents the year. For example,if you see a code that reads "A17," the "A" represents January,and the "17" represents 2017.

What does a battery code mean?

The code consists of a letter and a number. The letter represents the month the battery was manufactured, while the number represents the year. For example, if you see a code that reads "A17," the "A" represents January, and the "17" represents 2017. If you see a code that reads "C20," the "C" represents March, and the "20" represents 2020.

How do I know if my battery has a date code?

All digits are numbers. The date code labelis on a label located on either the top of the battery or the back side of the battery. The code on the top is 12 digits with the last 4 representing the month and year. In the example below 0220 means February 2020.

What is a Chinese battery date code?

Chinese battery date codes typically use a different format than other manufacturers. They often feature four characters,with the first two indicating the year and the remaining two representing the week number. For example,a code of 2124 represents the 24th week of 2021.

How do I know if my ACDelco battery has a date code?

ACDelco batteries have date codes on them. You can find them near the top or side. These codes tell you when the battery was made. This helps you choose a fresh,strong battery. The date code on ACDelco batteries also shows where they were made. The first letters tell you the plant.

How do you know if a battery has a serial number?

The 1st two digits of the serial number are letters with the remaining 10 digits being numbers. The date code is on a label located on the back side of the battery. The code is one letter, followed by one number. The letter is code for the month.
