How does a transfer cart battery work?

The battery provides power for the series of transfer cart. The DC current flows into the electrical box, and supplies power to the operating system and motor through the electrical box.

What is a battery cart?

Battery carts are industrial equipment with heavy duty construction for an extraordinarily long service life. They have load capacities from 2,400 to 3,000 pounds, supporting most types of industrial batteries. In the battery compartment, roller beds featuring heavy duty, poly-sleeved rollers facilitate transfer while preventing sparks and resisting corrosion.

What are the features of BHS battery carts & battery carriages?

Our battery carts and battery carriages have several features: Many BHS transfer carriages can be mounted to an existing pallet truck, converting your existing equipment into an efficient, reliable battery changer. Other models include self-powered travel or track-guided manual mobility.

How does a battery transfer carrier work?

This combination manual lift and powered extraction Battery Transfer Carriage features a hydraulic operated extractor arm. Extraction is accomplished with a heavy-duty hydraulic motor controlled by a manual control valve with overload relief for additional safety. Power is supplied by a 12-volt dc hydraulic power unit.

What is a BHS battery transfer carrier?

A BHS Battery Transfer Carriage is a piece of equipment equipped with smooth-rolling casters to easily transport batteries to charging stands (BHS Industrial Equipment). It is available in every combination of manual and powered functionality, and features phenolic wheels that provide low rolling resistance without damaging floors.

How many change-outs can a battery carriage accommodate?

Our most popular battery carriage accommodates up to 20 change-outs per day. Recommended for up to 50 change-outs per day, this powered battery changer is available with vacuum or magnet extraction. It is completely self-contained and portable, enabling change-outs anywhere in a facility (16 ft aisle clearance required).
