How do you get to profitability in battery manufacturing?

Getting to profitability in battery manufacturing is a multi-stage challenge, from actually building the factory, to ramping production up to a profitable level of throughput and yield, to maintaining quality and profitability over the long run.

How do you win in battery manufacturing?

Winning in battery manufacturing is all about getting the combination of throughput (number of units you make) and yield (percentage of production that passes quality control and can be sold to customers) to a profitable state as quickly as possible.

What is battery manufacturing & how does it work?

Battery manufacturing is complicated: At a high level, battery manufacturing comprises three main stages -- electrode fabrication, cell assembly, and end-of-line. However each of these stages comprises dozens of individual steps, and hundreds (if not more) of equipment settings: speeds, temperatures, pressures, and so on.

What are the challenges of battery manufacturing?
