

Canadian utility pole solar street light price

What is a solar street light pole?

A solar street light pole is a type of light pole designed to support solar-powered street lights. Aluminum is a common material used for making solar street light poles, which are generally more than 3 meters high and come in two varieties: aluminum alloy spinning light poles and casting light poles.

Where can I buy a pole in Canada?

High quality tubular steel, aluminum, traffic, power distribution and transmission, decorative, street and area lighting, commercial use, and infrastructure poles from Nova Pole, a leading Canadian pole manufacturer. Call us at 1-866-874-8889 to order in BC, Alberta, and Ontario, or learn more about our entire product selection.

What wattage does a street light need?

Designed for both residential and commercial use, these lights are ideal for streets, yards, playgrounds, driveways, parking lots, farms, cottages, plazas, and off-grid locations. The collection includes a range of wattages--100w, 300w, 500w, 600w, 700w, 900w, and 1200w--ensuring versatile lighting options to meet different needs.

Are BIGM solar street lights a good choice?

BigM heavy-duty exclusive solar street lights for outdoor are designed to significantly impact outdoor spaces with their powerful brightness lasting throughout the night. Despite their large sizes, they are easy to install, providing an efficient lighting solution for various outdoor settings.

What is a tubular steel pole used for?

We manufacture and market tubular steel poles for use in highway and street lighting, traffic signage, electrical distribution and transmission towers, wireless communication towers, high mast and sport lighting poles, transit poles, solar lighting and wind tower poles, plus an extensive line of decorative streetscape lighting poles and bases.

For this project we chose the sectional steel pole, which is a 35" galvanized steel pole that fits together by sliding each successively smaller section over the lower section. This is the same process they use for those giant light poles along major highways. The pole arrives on a standard skid and can easily be assembled by two ...
