How will the Big Canberra battery project work?

Selection of the battery operator will be made in late 2024 following a procurement process. The Big Canberra Battery project will provide renewable energy security across the electricity grid, help the ACT grow its renewable energy sector, provide more local employment opportunities, and deliver a positive financial return for the Territory.

What is the Big Canberra battery?

The Big Canberra Battery has inched a step closer to being built, with the ACT government announcing it will partner with Eku Energy to deliver the mass-energy storage device. Eku Energy will design, build, run, and ultimately own the 250-megawatt battery, which will be located at Williamsdale, south of the Tuggeranong town centre.

Who is delivering the Big Canberra battery in Williamsdale?

The Government has partnered with Eku Energy to deliver the next stage of the Big Canberra Battery with a large-scale battery storage facility in Williamsdale.

Who is building Canberra's biggest battery?

Render of Big Canberra Battery. Image: Eku Energy. The ACT government has selected Macquarie Group's newly formed global battery group Eku Energy to build one of the largest big batteries in the country in the national capital, and featuring an innovative although secretive financing deal.

Will a big battery power Canberra?

The government said the big battery project will be capable of responding rapidly to network constraints and will be able to store enough renewable energy to power one-third of Canberra for two hours during peak demand periods. The Williamsdale battery will be developed, built and operated by Macquarie Group offshoot Eku Energy.

Will Eku Energy deliver the next stage of the Big Canberra battery?

"Eku Energy is delighted to partner with the ACT Government to deliver the next stage of the Big Canberra Battery and support the Government's commitment to achieve net zero emissions in the Territory by 2045.
