

Chinese aluminum electrolytic capacitor market has been expanding amid a transfer of its downstream industries to China like home appliance illumination, cellphones and computers as well as automatic control, with breakthroughs having been made in particular technical areas.

In 2023, approx. 1,696B units of electrical capacitors were imported into China; picking up by 2.2% against the previous year's figure. Overall, imports enjoyed a prominent increase. The most prominent rate of growth was recorded in 2020 with an increase of 92% against the previous year.

Global Capacitor Market Overview. Capacitor Market Size was valued at USD 35.6 Billion in 2022. The Capacitor market is projected to grow from USD 37.8 Billion in 2023 to USD 61.1 Billion by 2032, exhibiting a compound annual ...

Capacitor Market Size, Share, and Trends 2024 to 2034. The global capacitor market size accounted for USD 38.91 billion in 2024, grew to USD 41.23 billion in 2025 and is predicted to surpass around USD 69.42 billion by 2034, representing a healthy CAGR of 5.96% between 2024 and 2034. Last Updated : 14 Nov 2024

China Electric Capacitor Market Size, Share, Opportunities, COVID-19 Impact, And Trends By ...

This report provides an in-depth analysis of the capacitor market in China. ...

The global capacitor market is forecast to reach \$39.5 billion by 2030 with a CAGR of 6.2% from 2024 to 2030. This report covers the market size, growth, share & trends.

Spurred by strong demand from downstream industries, Chinese MLCC market is enlarging from RMB67.353 billion (up 21% YoY) in 2018 to expectedly RMB130.015 billion in 2025. MLCC mainly finds application in such fields as consumer electronics, automotive electronics, industry/IoT/security, and military electronics.

China's government initiatives to promote green transportation solutions have significantly boosted the adoption of electric vehicles, thereby increasing the demand for capacitors. The region is also witnessing substantial investments, with companies like Exxelia acquiring local firms to expand their presence.

Capacitors Market by Capacitor Type, Voltage Range, Application, Material, End-User Industry, ...

The Capacitor Market is expected to reach USD 25.21 billion in 2024 and grow at a CAGR of 5.90% to reach USD 33.57 billion by 2029. TDK Corporation, Murata Manufacturing Co., Ltd., KEMET Corporation, Vishay Intertechnology, Inc. and WIMA GmbH & Co. KG are the major companies operating in this market.

Electric capacitor market size was valued at USD 21.3 billion in 2024 and is estimated to register a CAGR of 7.4% between 2025 and 2034, driven by rising electric infrastructure spending.

Capacitors Market by Capacitor Type, Voltage Range, Application, Material, End-User Industry, Dielectric Material, Configuration - Global Forecast 2025-2030

In 2023, the Asian capacitor market decreased by -66.5% to \$73.2B, falling for the fourth consecutive year after three years of growth. Overall, consumption, however, continues to indicate a deep downturn. Over the period under review, the market hit record highs at \$437B in 2013; however, from 2014 to 2023, consumption remained at a lower figure.

This market report covers trends, opportunities and forecast in the global capacitor market to 2030 by end use industry (telecom, computers, consumer electronics, automotive, industrial, and others), voltage (low voltage and high voltage) capacitor type (ceramics, aluminum, tantalum, papers and plastics, and supercapacitors), and region (North ...

China electric capacitor market is estimated to be valued at US\$9,117.290 million in 2020. Electric capacitors are electronic components that store and release electricity. A capacitor is almost usually included in an electrical circuit because it is a necessary component of electronic equipment. Because of its simple charging and discharging characteristics and lightweight, it ...
