

## Capacitor c16v

Can a 16V capacitor be used at 125°C?

You can apply maximum 10.7V to the capacitor for the entire operation temperature range to 125°C (voltage derating 20% is covered by the 33% temperature derating). Thus 16V capacitor is NOT suitable for 125°C device due to the high temperature. Need higher rated 20V tantalum polymer capacitor.
