

Chicago battery manufacturer

What's going on with a new battery manufacturing facility in Chicago?

The Chicago-headquartered battery startup held a ribbon-cutting Friday for its new 17,000-square-foot manufacturing facility in the West Loop. At peak production, the facility aims to deliver 50 tons per year of silicon oxide, a key component in batteries, including those that power electric vehicles.

Will Chicago become a battery capital?

NanoGraf Corp. is ready to make Chicago a battery capital for the entire United States. The Chicago-headquartered battery startup held a ribbon-cutting Friday for its new 17,000-square-foot manufacturing facility in the West Loop.

Will Illinois get a new battery manufacturing plant?

An electric vehicle is pictured charging in Chicago. (Andrew Adams /Capitol News Illinois) A new battery manufacturing plant is set to open in northern Illinois next year after the state offered more than \$330 million in tax incentives to make it happen.

Will NanoGraf make Chicago a battery capital?

Senator Dick Durbin (D-IL) praised NanoGraf as being the part of the next generation of innovative technology to come out of Chicago. NanoGraf Corp. is ready to make Chicago a battery capital for the entire United States.

Where is Gotion battery manufacturing located?

Gotion, a Chinese battery manufacturing and development company, announced on Friday that it will build a lithium-ion battery manufacturing facility in Manteno, about 50 miles south of Chicago. The roughly \$2 billion project is set to create 2,600 jobs and begin production in 2024.

How many jobs will a new battery plant create in Illinois?

The roughly \$2 billion project is set to create 2,600 jobs and begin production in 2024. The plant will produce battery cells, battery packs like the kinds used in electric vehicles and large-scale energy storage systems. Gov. J.B. Pritzker on Tuesday called the development "the most significant new manufacturing investment in Illinois in decades."

NanoGraf calls itself an advanced silicon anode battery material company that says it enables "stronger, lighter, and longer-lasting lithium-ion batteries." The company is working every day on what it says is the most energy-dense battery on the planet at its R&D lab, and federal dollars are making the difference.
