

# Chicago battery project bidding

Where can I find a bid opportunity in Chicago?

These bid opportunities are not advertised through the Department of Procurement Services but are administered by the various CMARs. To view these opportunities with the City of Chicago Department of Aviation go to: [FlyChicago.com/business/opportunities/bidscontracts/pages/default.aspx](http://FlyChicago.com/business/opportunities/bidscontracts/pages/default.aspx)

Does the Chicago Department of Aviation offer bid opportunities?

The Chicago Department of Aviation (CDA) offers bid opportunities through its Construction Manager at Risk (CMAR) program for the O'hare 21 program. These bid opportunities are not advertised through the Department of Procurement Services but are administered by the various CMARs.

What is going on with a new battery plant in Illinois?

Gotion Inc., a subsidiary of Chinese electric vehicle battery maker Gotion High-tech Co., will open a \$2 billion electric-vehicle battery factory in Illinois that will employ up to 2,600 people. A former Kmart distribution center in Manteno, about 50 miles from downtown Chicago, will house a new 150-acre lithium battery plant.

Why did gotion choose Illinois for a battery facility?

Li Zhen, chairman of Gotion, said choosing Illinois for a battery facility was not an accident and by doing so it would "help to boost e-mobility in North America and the economic and trade exchanges between China and the U.S."

How many jobs will a new battery plant create in Illinois?

The roughly \$2 billion project is set to create 2,600 jobs and begin production in 2024. The plant will produce battery cells, battery packs like the kinds used in electric vehicles and large-scale energy storage systems. Gov. J.B. Pritzker on Tuesday called the development "the most significant new manufacturing investment in Illinois in decades."

## Chicago battery project bidding

As the general contractor for the upcoming Bally's Chicago Casino project, CCBC is actively engaging with the community to communicate bidding and workforce opportunities. Interested parties can expect continuous outreach, including bid packages covering various aspects like demolition, structural work, steel, MEP equipment, and more.

The researchers did one round of pitches in 2022. Now, they are ready to move the technology out of the lab and have the commercial battery manufacturers and car manufacturers deploy, evaluate, and test it. While the researchers are focused on electric vehicles now, they also see their technology as a battery revolution. Lithium batteries are ...

The deal with Stadler U.S. includes a base order of eight two-car battery-powered trainsets, totaling \$154 million, which covers design, training, and spare parts. According to Metra's website, there is also an option to ...

Following the success with hydrogen units in California, Stadler will deliver Chicago Metra up to 16 FLIRT battery-electric multiple units (BEMU). This deal, representing the first competitive bid for battery trainsets in the U.S., underscores Stadler 's role in the development of rail vehicles powered by alternative energy sources.

A former Kmart distribution center in Manteno, about 50 miles from downtown Chicago, will house a new 150-acre lithium battery plant. The project will receive \$536 million in state...

Metra will receive a USD 169.3 million federal funding through Congestion Mitigation and Air Quality Improvement (CMAQ) to acquire battery trains for Chicago commuter rail network. The rail operator has issued a ...

For years, Silicon Valley was the obvious location choice for any deep technology company, particularly one focused on something as capital intense as battery science. The reason? Money.

eProcurement Bid Opportunities. These solicitations require an online response, are available only online, and not available for pick up in our Bid and Bond Room.
