

# China Bifacial Solar Panel Customization Company

How much do bifacial solar panels cost?

The price of bifacial panels is expected to range anywhere from INR4,79,271 to INR9,58,542. The size, brand, and material contribute to the total cost of any solar panel, not just the bifacial ones. The only people who can give you the correct prices are either manufacturers or solar installation companies.

What are bifacial solar panels?

Bifacial solar panels, like the ones on our Speed Solar Homepage, are solar panels with solar cells on both sides of the unit. They have glass on the front and a clear fluoropolymer sheet on the back, which allows them to produce up to 25% more energy than typical monofacial solar panels. These bifacial modules can be used with standard racking and inverters for any type of solar array.

Are bifacial solar panels available in the UK?

There are just a handful of manufacturers that currently have bifacial solar panels on the UK market but as time goes by, we're sure to see more manufacturers release their own models. Below are the bifacial solar panels available in the UK, all of which are monocrystalline.

What is a commercial solar power system?

Cut electricity costs and reduce your commercial building or office rooftop's carbon footprint with a high-performance commercial solar power system. Provides monocrystalline-silicon modules with high efficiency, high reliability and high yield, as well as offering survey and design solutions for homeowners.
