Are solar street lights maintenance free?

The solar street lights are designed to be essentially maintenance free. In regions with frequent rain, the tilt angles of the solar panels allow for self cleaning of dust. However, in places where rain is infrequent, periodic manual cleaning of the solar panels may be required.

What if the street light system is not in use?

When the street light system is not in use, the battery cannot be placed for a long time, and it needs to be discharged and charged regularly to keep it active. 3- Regularly inspect the working status of the street light poles. If there is any scratch that causes the anti-rust coating to fall off, it should be repaired in time.

How long do solar street lamps last?

1- Solar panels are the components with the longest service life in solar street lamps and generally have a service life of more than 25 years. During use, if there is dust and fallen leaves on the surface of the components, it will affect the power generation efficiency.

Can a street light be installed on one side of a road?

1) On some roads, street lights are installed on one side of the road, and some roads are equipped with street lights on both sides of the road. This data sheet is suitable for one side of the road.
