What is a lithium-ion battery storage cabinet?

DENIOS presents its Energy Storage Cabinet specifically crafted for Lithium-Ion batteries, ensuring secure containment and charging. These meticulously designed lithium-ion battery storage containers guarantee comprehensive safeguarding, including 90-minute fire resistance against external sources.

What is a lithium ion cabinet?

What is a lithium-ion cabinet? A lithium-ion cabinet, also known as a battery charging cabinet or battery safety cabinet, is a special fireproof storage unit designed to charge and safely store multiple batteries simultaneously.

Are lithium-ion cabinets safe?

Our lithium-ion cabinets with 90-minute fire protection offer the safest option for storing modern energy storage systems. The charging cabinets are equipped with shelves and a plug-in design for connection to the mains supply. This allows you to store and charge lithium-ion batteries at the same time. Looking for a larger solution?

What happens if a lithium battery is stored in a Nios Safety Cabinet?

If a fire breaks out in a building where lithium batteries are stored in a DENIOS safety cabinet, the fire brigade will have at least 90 minutes to evacuate people in case of fire and an escalation of the fire due to ignition or explosion of lithium batteries in the enclosed cabinet can be avoided.

What is a battery charging cabinet?

Organisation and tidiness: a battery charging cabinet enables batteries to be stored centrally and neatly. Efficient charging: The charging cabinet usually offers individual slots or compartments for each battery. This allows batteries to be charged simultaneously and efficiently.
