

## Connect to power source and the battery is still low

Why am I receiving a 'low power source detected' notification?

Thank you for posting your query, I will be glad to help you. If you're receiving a &quot;Low power source detected&quot; notification when you plug in your charger to your HP Pavilion laptop, it may indicate a problem with the power source or the laptop's charging system. Here are some steps you can take to troubleshoot and potentially fix this issue.

Why does my laptop display a low battery message?

Please read the entire post & the comments first, create a System Restore Point before making any changes to your system & be careful about any 3rd-party offers while installing freeware. If your laptop displays Low battery message even when plugged in, there might be an issue with the battery. Use these fixes to resolve the issue.

How do I fix a low battery on my laptop?

Use another wall socket to change your laptop and see if the low battery message occurs this time. If it does not, call a technician and repair the wall socket because it can damage your laptop or another electronic device you connect to it. Power Troubleshooter is an automated tool in Windows 11/10 that helps fix power-related issues.

Why is my laptop battery not working?

While the cause of laptop battery errors can be rather mysterious, there are a number of ways to work out what the problem is and fix it. Plug in your laptop. It's possible the battery has simply run out of juice, so before you begin panicking, attach it to a power source. Wait for at least 15 minutes, then try turning it on.

How to fix a faulty laptop battery?

Turn off your laptop. Disconnect all the peripherals and the charger. Remove the laptop battery. Skip this step if your laptop has a non-removable battery. Press and hold the power button for up to 30 seconds. Connect the battery and turn on your laptop. Now, check if the issue occurs. The fault may also be associated with your laptop charger.

How do I turn off low battery notification?

You can turn off the low battery notification in the Control Panel. Open the Control Panel and Power Options in the Control Panel search bar. Select Power Options. Click Change plan settings. Click Change advanced power settings. Expand the Battery branch and then expand the Low battery notification branch. Turn off the notification.

This started a week or two ago, where instead of my laptop giving me the low battery warning, and I can continue to use it after I plug it in, it just shuts down instead of giving me said warning. Any way to fix this?

## Connect to power source and the battery is still low
