

Does BYD sell electric cars in Denmark?

Copenhagen, Denmark - BYD, the world's leading manufacturer of new energy vehicles and power batteries, has appointed Nic. Christiansen Group as a national dealer for its electric passenger vehicles in Denmark.

Can electric cars be sold in Denmark?

A precondition for the sale of electric cars is a functioning and well-distributed charging infrastructure. For Denmark, it has been estimated that 2000 fast charging stations would be needed to reach the governments' goal of 1 million electric vehicles by 2030 (DTU and DEA, 2019).

Will Denmark have a 500,000 EVs by 2030?

The 2019-elected government has a goal for Denmark to have 500,000 PEVs (BEVs and plug-in hybrids) and a ban on new gasoline and diesel cars by 2030. The intent is to reach the goal by investing in charging infrastructure and prolonging the agreement on discounted electricity for private customers (Socialdemokratiet, 2019).

How many fast charging stations are needed in Denmark?

For Denmark, it has been estimated that 2000 fast charging stations would be needed to reach the governments' goal of 1 million electric vehicles by 2030 (DTU and DEA, 2019). However, BEV adoption also requires that people are aware of ongoing improvements in charging infrastructure and vehicle technology.

How many charging points are there in Denmark?

The number of charging points per million population is slightly lower than in Denmark with about 300 chargers. The fast charge/level 2 charging point ratio, however, is higher compared to Denmark (Region Skåne et al., 2019). 2.3. The present study

Why do people buy a BEV in Denmark?

In Denmark, perceived uncertainty about political support is significant but not in the expected direction, meaning that the more uncertainty people express, the more likely they are to buy a BEV (again). This may indicate that people who express uncertainty are in particular people who intend to buy a BEV but await more policy support.
