

Display cabinet powered by batteries

Are display lights battery powered?

We have developed a range of Display Lighting that is battery powered. Over the years we have gone from using Sealed Lead Acid Batteries to a Modified, Hand Held Battery which is around the size of an iPhone 6 plus. The new batteries are much easier to carry round, swap over and charge for both customers and our staff.

Where can I use battery powered display lighting?

All now easier! Take it anywhere! Display Lighting has put together some amazing kits of battery powered display lighting designed to be used in Exhibitions, Art Galleries, Antique & Craft Fairs and Museums where there is little or no access to a mains power supply.

What are the benefits of battery powered display lighting?

Battery powered lighting has the added advantage of not having to pay for additional electricity socket on your exhibition stand or need to have PAT testing done on your cabinets each and every show. The following properties of the display lighting mean that all aspects are covered with regards to having lighting for your exhibition.
