

# Dual battery high power electric chain saw

What is the best electric chainsaw for heavy-duty cutting?

Makita makes the best electric chainsaws for heavy-duty cutting. All the chainsaws on my list are quality made saws that can all fit the definition of "best electric chainsaw", but as you would expect, the more expensive saws are more durable, have more features, and can tackle tougher jobs.

Which battery is best for a chainsaw?

This comes with the HIGH OUTPUT HD12.0, a 12Ah high-output battery for the best performance. This gives you 50% more power, and runs about 50% cooler. If you're going to spend the money to get this chainsaw, it would make sense to get their most advanced RedLithium battery and benefit from its design.

Are corded-electric and cordless battery-powered chainsaws the same?

In this article we review both corded-electric and cordless battery-powered chainsaws. If you're a purist, then you only consider a corded-electric to be classified as an "electric" chainsaw. Many people use the term "electric chainsaw" to describe both types. I know, because I did the research, peaking in forums to see what people were saying.

How do you use a battery-powered chainsaw?

Use a steady and controlled motion when cutting and avoid overreaching. Keep the chainsaw's power cord away from the cutting area to avoid tripping or getting caught in the chain. When using a battery-powered chainsaw, ensure that the battery is fully charged before using and keep extra batteries on hand.

What is a cordless electric chainsaw?

Unlike corded electric chainsaws, which require access to a power source, cordless electric chainsaws run on battery power, making them ideal for working in remote areas. The best high-quality cordless chainsaws today can equal the power of a 45cc gas chainsaw, making them more than sufficient for most homeowners' needs.

What is the fastest electric chainsaw?

Electric chainsaws traditionally lagged behind gas-powered models in cutting performance. But the EGO Power+CS2005 rewrites the rules. This battery-powered chainsaw is the fastest we've ever tested, surpassing even our 20-inch gas chainsaws.

High Power Output: 82V/4.0Ah Chainsaw features 3.4kW output - equivalent of 65cc gas power units. Cutting System: 20" bar cuts faster with chain speed of 82 ft/s; Superior Design: Eliminate priming, recoil starters, engine maintenance, and fuel with a smarter engineering that offers 1,000 hours of high-performance commercial use.
