

EU cancels solar cell subsidies

Are Chinese subsidies suffocating EU solar industry?

BRUSSELS -- The European Commission is in early-stage talks on emergency measures to buoy drowning EU solar manufacturers who say Chinese subsidies are suffocating the industry, according to two people familiar with the matter.

Did EU subsidies make 'unduly' competitive offers when bidding for a solar park?

The European Commission, the EU's executive arm, said Wednesday that it would assess whether foreign subsidies enabled the two consortia to submit "unduly" competitive offers when bidding for a contract to build and operate a solar park in Romania partly funded by EU money.

Are European solar panels going out of business?

Major European solar manufacturers such as Meyer Burger have shut plants or cut their output. China supplies about 95 per cent of the panels used in the EU, according to the think-tank Bruegel.

Will Germany replace a subsidy for solar panels?

REUTERS/Lukas Barth/File Photo Purchase Licensing Rights BERLIN, Dec 17 (Reuters) - Germany's Economy Minister Robert Habeck said he aimed to replace a subsidy to makers of solar panels that fell victim to a court ruling last month that scrapped swathes of the budget, arguing support was needed to compete with Chinese manufacturers.

Are Chinese solar modules flooding the EU market?

Industry data suggests that solar modules from China sold for 50 % of their production cost are flooding the EU market. While this influx can help the deployment of solar power in Europe in the short term, imports at dumped costs open the door to products benefiting from unfair market and labour conditions.

Are We about to lose the solar industry in Europe?

We're about to lose the industry in Europe. "The EU is hoping to bring 30 gigawatts of solar production capacity back to the bloc by 2030 as part of its proposed Net-Zero Industry Act, after losing much of its industry to Beijing a decade ago. EU countries produced just 1.5 GW of their own solar panels last year.

According to the latest Commission report on EU trade defence instruments, "dumped and subsidised imports from China remain the greatest challenge causing damage to ...

EU solar manufacturers say they face an existential crisis due to Chinese subsidies, which they blame for flooding the EU with dirt-cheap solar panels and creating a supply glut that is causing a wave of bankruptcies. Not everyone agrees, however, that Brussels should challenge China over its solar practices, given that it might ultimately ...
