

Energy Storage Product Registration

Where can I find information about energy labelling?

Check the database here. The European Product Registry for Energy Labelling database has been launched for public access and consultation. Products with an energy label are registered and can be consulted for information and comparison. This allows to meet the consumer's specific needs by identifying the most energy-efficient product models.

What is eprel (European product registry for energy labelling)?

The 'product database', established in application of Article 12 of the Energy Labelling Regulation, is designated as 'EPREL' (European Product Registry for Energy Labelling). Suppliers have to upload models data in a 'Compliance system':

What are the requirements for energy labelling?

Beyond the requirements on the provision of the energy label, the Energy Labelling Regulation requires, from 1 January 2019, that suppliers, prior to placing on the Union market any product in the scope of the Energy Labelling legislation, register any such model in the product database (Article 12 of the Labelling Regulation (EU) 2017/1369).

When do suppliers have to enter data on energy consumption?

Starting at 1 January 2019, suppliers are obligated to enter the necessary data on energy consumption into the EPREL-database for each product it places on the market. For products already on the Union-market, from 1 August 2017, a transitional regime applies; for these products the database must be filled in by 30 June 2019 at the latest.

Do you need an energy label?

As of 1 January 2019, Suppliers (manufacturers, importers or authorized representatives) need to register their product models, which require an energy label, in the European Product Registry for Energy Labelling (EPREL), before placing on the EU/EEA market the first product of a model in the scope of the Labelling legislation.

What is a 'energy label'?

Its primary purpose is to make information about the energy and environmental performance of all models of products bearing the 'energy label' readily available: these include household products, as well products for the business-to-business market.

The European Product Registry for Energy Labelling database has been launched for public access and consultation. Products with an energy label are registered and can be consulted for information and comparison. This allows to meet the consumer's specific needs by identifying the most energy-efficient product models.

Energy Storage Product Registration

Thank you for registering your Briggs & Stratton product(s). Click the buttons below to download or email a copy of your registration form. Don't forget to tell others what you think of your product by reviewing it here.
