Pinneng power bank uses high-quality lithium polymer batteries to provide efficient and reliable charging. These batteries last longer than traditional lithium-ion batteries and retain...

Rechargeable batteries lose their charge when they aren"t in use because of the natural chemical reactions within the cells. Long-term, the cathodes within the battery wear out, which is what causes the battery capacity to drop. Let"s start with the self-discharge issue, where a battery drains power even when not being used. The reactions in the battery cause the ...
