Most lithium-ion batteries cost \$10 to \$20,000, depending on the device it powers. An electric vehicle battery is the most expensive, typically costing \$4,760 to \$19,200. Next is solar batteries, which usually cost \$6,800 to \$10,700. However, most outdoor power tool batteries only cost \$85 to \$330, and cell phone batteries can run as little as \$10.

As many people involved in the development of electric vehicles and their batteries know, almost half the cost of a new EV comes from its battery pack. That's huge, particularly when you consider that traditional internal combustion engines (ICE) represent only 20 - 30% of vehicle costs today (see chart below). Now imagine that you're an ICE vehicle ...

The price of Titanium (Ingot 99%, China) increased during December 2019 to 6,750 USD per metric ton, which represents a slight rise of 1% compared to the previous month's value. On a year-over-year basis, the prices of Titanium ...
