

How much does it cost to sell batteries

How much do old batteries cost?

The more you have, the more they will pay you. Generally, the scrap price for old batteries is often \$0.22 per pound. This price is subject to change depending on the type of battery and market conditions. Some scrap yards might give you even more money if your old batteries contain valuable metals.

Is battery recycling worth it?

Battery recycling is always worth it, no matter the price. However, if you want to cash in on your scrap batteries, it is a good idea to understand why the prices fluctuate. Knowing the reasons behind these ups and downs in the scrap battery market can help you make the best decision for your business when it comes to scrapping used batteries.

Should you sell a battery?

Making sure you sell anything as scrap at the right time is always key, and a battery is no different. If you're absolutely certain that your battery has given up and there's no other gremlins creeping in like your electric or alternator, then the best bet is to sell up and get a working replacement.

How much does a battery cost?

Below we list the price examples for some countries. France SCRELEC: Alkaline primary batteries - 0.402 Euro / kg COREPILE: Primary lithium batteries - 2.350 Euro / kg Note: Screelec and Corepile also require you to pay a minimum annual contribution of 200 Euro excluding VAT.
