

# How to remove the household battery cover

How do you remove a car battery?

The most common location for a battery is in the front driver's-side corner of a car. Pull up on the latch on the side of the boxlike cover; the plastic should come free. Then lift the cover straight up and off the battery. Avoid touching the battery itself, especially if it is cracked or leaking.

How do you replace a car battery?

If you want to replace the battery in your car or examine it for cracks or leaks, you may need to remove the cover first in order to access the battery itself. Park your car and put it in "Park"; if it is an automatic or first gear if it has a manual transmission. Place the parking brake on in order to secure the car while you work under the hood.

How do you remove a battery from a punch?

You can place the punch so it fits over the battery and then tap...it will pierce the plastic leaving the battery very easy to remove. The punches come in sized up to about 15-20mm. smaller sizes are more common. Could CHOICE not talk to manufacturers to get them to either include instructions or modify the packaging???

How do you clean a battery cradle?

Wipe the battery and cradle off with distilled water and a cotton swab. When the foaming stops and there are no major deposits left to be scraped out, you're ready to rinse off the inside of the cradle. Dip 1 clean cotton swab into a cup of distilled water. Then dab the cotton swab back and forth along the inside of the battery cradle.

How do you remove a battery from a knife?

Hold the knife's blade at a 45-degree angle and press it downward along the surface of the battery to chip off bits of corrosion. After you have removed the major deposits, use a wire brush or steel wool to remove any remaining deposits.

How do you clean a battery with baking soda?

Dip a cotton swab into the baking soda mixture. Smear the baking soda paste onto the battery connections and the 2 terminals at the end of each battery using the cotton swab. Once the baking soda is applied, you may see it bubble and foam, as it reacts with the corrosion. Let it soak in for about 5 minutes.

In modern cars, the battery is often shielded by a protective cover. If you want to replace the battery in your car or examine it for cracks or leaks, you may need to remove the cover first in order to access the battery itself.
