How to stick the battery screws

How do I charge my stick up Cam battery?

Make sure the provided battery is fully charged by plugging it into a USB port using the provided orange cable or any other micro USB cable you have handy. The battery is fully charged when just the green LED is lit. Remove the battery cover on your Stick Up Cam by twisting it counterclockwise to unlock.

How do I remove the screws from the battery?

Make sure you're careful and take your time. The screws are rather difficult to get out and if you rush you could strip the screws. I suggest you get a good screwdriver. I also think you should keep in mind that with that battery you can't use the extra circle pad or most cases.

How do you lock a stick up Cam?

Line up the " open lock" symbol on the rear of your Stick Up Cam with the line on the battery cover. Push the cover on and twist clockwise to lock into place. Tighten the screw Use the star-shaped end of your Ring screwdriver to tighten the security screw on the bottom of your Stick Up Cam.

How do I remove a ring camera battery?

Remove the screw holding the mounting bracket to the ring camera with a Torx T15 Tool. Remove the PH00 screws at the top of the battery compartment. Remove rubber pad in the battery cover with the Spudger Tool or flat head screwdriver to reveal PH00 screws that hold the battery compartment to the ring camera enclosure. Remove the PH00 screws.

How do you mount a stick up camera?

Choose a spot where it can provide the view that you want. Place the rubber pad on the bottom of the base. Snap the cover onto the base. Place your Stick Up Cam on a table or shelf. Push the rubber pad into the top of the base. Flip the base toward the rear. Swivel the base above the camera. Make sure the camera is mounted right side up.

How do you remove a flex cable from a battery holder?

The top cover is held in place with an O-Ring. Then,gently,loosen the flex ribbon cables from their connectors with the Spudger Tool,and pull the flex cables away from the connectors. With Spudger Tool,gently press down on the Battery Holder from the topside until it become loose.

Remove the battery cover on your Stick Up Cam by twisting it counterclockwise to unlock. If the battery is already inserted, remove the battery. After charging, insert the battery into the bottom of your Stick Up Cam until it locks into place. 3. Choose your location. Your Stick Up Cam will be happy just about anywhere.
