

How to use the solar turntable

How does a solar turntable work?

From first glance, you'll notice that there's a built-in solar panel on the front panel. This utilizes the power of the sun to forgo any use of batteries. Simply spin the clear turntable in the direction you'd like, point the solar panel towards sunlight, and it'll endlessly spin without interruption.

How do you use a turntable?

To use a turntable on a stretch wrapping machine, all you need to do is drop the base, plug it in, and operate it. Fitted with a photocell for automatic height sensing and a basic control panel for easy operator control, it's ideal for a production line that needs to wrap around 50 to 150 pallets per day.
