Will italtvolt build an EV battery plant in Italy?

Italtvolt aims to build Italian EV battery plant in spring 2023. The changing needs of the supply chain mean a key battery gigafactory project in Italy is evolving,says Lars Carlstrom,CEO of Italtvolt. The company is starting to build a gigafactory for silicon batteries for electric vehicles in Europe on the old Olivetti site in northern Italy.

Where is italtvolt battery factory located?

Italtvolt has made a strategic decision to locate its battery cell factory in Italy,the country where Alessandro Volta invented the battery in 1800. Today,Italy holds significant opportunity for the modern battery industry,with its strategic location and highly skilled workforce.

What is Italy's largest battery cell factory?

Italtvolt's45GWh battery plant will be the Italy's largest,independent,battery cell factory. The battery cell factory will focus on creating new opportunities for re-skilling and upskilling workers from Italy's automotive industry.

How many lithium-ion battery factories are there in Europe?

The European Battery Alliance reports that there are a total of 25announced projects for lithium-ion battery factories in Europe which could add as much as approximately 500GWh production capacity for Europe by 2030.

Is Italy a good place to start a battery industry?

Today,Italy holds significant opportunityfor the modern battery industry,with its strategic location and highly skilled workforce. Italy has a rich industrial heritage,especially as a hub of Europe's automotive industry,offering access to a large,skilled workforce.

Can Italy create a Gigafactory for electric vehicles?

One of those projects by Italtvolt Spa aims at creating in Italy one of the largest gigafactories in Europefor the production and storage of lithium-ion batteries for electric vehicles. The plant on a 100-hectare site in Scarmagno,Northern Italy has a planned capacity of 45 GWh for about 550,000 electric vehicles per year.
