Wholesale Lead-Acid Battery for PV systems Invented in 1859 by French physicist Gaston Planté, the lead-acid battery is the earliest type of rechargeable battery. In the charged state, the chemical energy of the lead-acid battery is stored in the potential difference between the pure lead on the negative side and the PbO₂ on the positive side, plus the aqueous sulphuric acid. The ...

Note. Batteries should be in storage with power or recharged fully every 3 weeks as the process minutely discharges. I now only use supplemental maintainers with a desulfonation feature FLOODED BATTERIES ONLY. Equalizing is an overcharge performed on flooded lead acid batteries after they have been fully charged.

Flooded lead-acid batteries and sealed lead-acid batteries are always being compared with ...
