

Old warehouse converted into solar house

Should you convert a warehouse to a home?

If you like a home with plenty of open space, high ceilings and a sense of history, a warehouse to home conversion would appeal to you. This is one way to create an urban/industrial design style that is born from a community's commitment to preserving its history. How many people do you know that can say they live in a warehouse?

What is a warehouse conversion?

They provide a sound structure that blends industrial elements with modern space and openness. These homes are also a great alternative for people struggling to find a home of their choice in the hot real estate market. Warehouse conversions are noted for their soaring ceilings, often highlighted with exposed ductwork or steel and wood beams.

Can shuttered industrial facilities be converted into housing?

These examples explore possibilities for converting extremely valuable inner-city land covered with shuttered industrial facilities into housing in order to meet the contemporary crush of residential demand. This is a tricky proposition, as renovating former industrial facilities is often time-consuming, expensive and occasionally dangerous.

Are warehouses good for residential conversion?

Sturdy Structure: Warehouses are typically built with robust materials to support heavy loads, making them structurally sound for residential conversion. The solid construction of warehouses ensures durability and longevity, providing residents with a safe and secure living environment.

How did Clancy Moore Architects convert a warehouse into a home?

Local practice Clancy Moore Architects converted this Dublin warehouse into a home and studio by organising intimate, cosy spaces around a double-height atrium.

Can warehouse structures be reused?

We have selected 25 projects to demonstrate how adaptive reuse of warehouse structures can be a great option for multiple purposes - residential, cultural, commercial, services - in addition to being an eco-friendly solution by recycling the existing architecture.
