Whenever motion is detected it will take a photo, send it to me, and then record a 10-90 second video depending on my settings. To see the video I have to get the SD card though, but at least I know when somebody is around. You won't get anything that runs 24/7 without a hard wired power supply, but the motion activated notifications are nice.

The solar connectivity lets you harness the sun's energy to top up your station every day for unlimited power. Just a few hours of solar exposure can fully recharge a compact, high-capacity power station. This keeps your tech powered for capturing stunning landscape and night sky photography well off the beaten path. In Closing

For wildlife photography, your power station should be able to withstand the rigors of outdoor use. Look for
