Philippines Solar Cell Assembly 220v

installers all over the Philippines. We offer cutting-edge European and Asian brands that boast the highest standards, and are continuously ...

I plan on getting the generator(s) so I get the necessary 220V we have here in the philippines. Then I want to put it between the grid and my home so that all appliances usally run from the battery. I see that I can add 400W Solar Input, and as Im in the Philippines I guess that would be perfect here to minimize cost of the system.

SolarCell PH aims to transform energy delivery with cleaner, affordable alternatives to traditional utility bills. Founded in July 2017, focuses on providing clean electricity to urban and peripheral areas using top solar panel brands.

In the case of the solar industry, most solar companies work with solar OEMs to build and design their own solar products such as solar panels, cells, modules, etc. OEM becomes their outsourcing partner that helps them in assembling and reproducing their solar products.
