When is the second green energy auction in the Philippines?

The government of the Philippines is set to hold the country's second renewables auction on June 19. The Green Energy Auction Bids Evaluation and Awards Committee (GEA-BEAC) of the Philippines Department of Energy (DOE) has published a list of qualified bidders for the Second Green Energy Auction Round (GEA-2).

When is the second Renewables auction in the Philippines?

The government of the Philippines is set to hold the country's second renewables auction on June 19.

Will gea-4 be a major theme for the Philippines' next green energy auction?

The Philippines' Department of Energy (DOE) has said that energy storage and maximizing the country's existing renewable energy infrastructure will be a major theme for its next green energy auction. GEA-4 will take place in the final quarter of 2024. From ESS News

Will LNG-generated capacity be auctioned in the Philippines?

"We will auction it(LNG-generated capacity),so we have to talk to the National Grid Corporation of the Philippines because that is going to be considered as part of ancillary services," Guevara stressed.

Is the Philippines a hot topic at Solar Media's Energy Storage Summit Asia 2024?

The Philippines was a hot topic of discussion at Solar Media's Energy Storage Summit Asia 2024 last month--see our write-up of one of its panels discussing the country's energy storage market here (Premium access).

How much will energy storage cost in re capacity auction?

The integration of energy storage system in the forthcoming batch of renewable energy (RE) capacity auction will hike estimated reserve prices by P5.00 to P6.00 per kilowatt hour(kWh),according to the Department of Energy.

The integration of energy storage system in the forthcoming batch of renewable energy (RE) capacity auction will hike estimated reserve prices by P5.00 to P6.00 per kilowatt ...

The DOE of the Philippines has announced on Tuesday that it will hold a storage-focused green energy auction, GEA-4, in the fourth quarter of 2024. The auction's remit will cover Integrated...

Countries around the world are increasingly switching to battery energy storage systems (BESS) to drive greater grid reliability and broader adoption of renewable energy sources. BESS facilities, projected to grow at ...
