

Physical stores selling solar panels

Where can I buy solar panels?

You can purchase solar panels from local retailers or online stores. However, we recommend working with a qualified solar installer to design and source your solar panel system. Professional installation will ensure you have enough panels to meet your home's energy needs. The simplest way to go solar is by purchasing a complete installation.

Should I buy a solar system?

A direct purchase is a good option if you are looking for solar kits specifically designed for DIY projects. But if you want a rooftop solar system, we recommend contacting a professional installer. Attempting a solar panel installation on your own can be very dangerous and could void your solar panel or roof warranty.

What is Sun store?

sun.store is a rapidly expanding online platform, a marketplace dedicated to the photovoltaics industry. The marketplace where installers can buy all the PV equipment they need - modules, inverters and batteries. We combine offers from hundreds of sellers across Europe, so it is easy to search and compare availabilities and prices.

Do I need a PPA to buy a solar system?

You do not own the system with a PPA and long-term savings are lower than those achieved with a cash purchase or loan. As a solar panel owner, you can also claim incentives such as the federal solar tax credit, which offers a tax credit worth 30% of your total solar system costs.

How long do solar panels last?

The best solar panels have a 25-year product warranty, guaranteeing your equipment will properly function for decades. Many reputable installers also extend warranties to cover panel performance and system installation. You can purchase solar panels from local retailers or online stores.

How much does a home solar system cost?

Based on our research, the average cost of a home solar system is \$2.85 per watt. You could expect to pay around \$14,250 for a 5 kilowatts (kW) solar system or \$28,500 for a 10 kW system, before incentives like the 30% federal tax credit. There are four main ways to pay for a solar power system:
