

Price of centralized battery cabinet

What are central battery cabinets?

Central battery cabinets are devices made in the form of control enclosures intended for vertical placement on the ground. The doors are equipped with locks preventing unauthorized access to the interior. Inside the cabinets there is a mounting plate with the basic elements of the system.

Where are the central battery systems made?

All our central battery systems and their components, as well as all the accessories and spare parts related to these systems, are designed and manufactured in our own factory in Finland. The central battery systems are always made to order, according to the needs of the customer.

What is the srb10 Battery Cabinet?

The SRB10 Battery Cabinet is an outdoor-rated enclosure that can hold up to 10x SR5K-UL battery modules for a total energy capacity of 50 kWh. The cabinet is outdoor-rated with automatic, temperatu...

What is a CBS central power supply system?

The CBS central power supply system is an advanced, reliable and user-friendly central battery system, designed in compliance with the requirements and all important standards. The system provides the possibility of monitoring circuits, luminaires or both.

How many batteries can a battery control system control?

Communication between the sensors and the master device takes place via an additional communication line. The system enables control of up to 72 batteries (maximum 4 parallel branches with 18 batteries connected in series in a branch). After exceeding the temperature and voltage limits, the error /failure is signaled.

What does a CBS Central Unit do?

The system provides the possibility of monitoring circuits, luminaires or both. The CBS central unit is equipped with a controller that supervises the operation of the entire system and archives all information about the events that have occurred and the system state.
