

Rented lithium batteries

Should you use a lithium-ion battery for your rental equipment?

If the rental equipment is running on traditional, lead-acid batteries, eventually, a service tech will have to be sent to the end-user to replace or maintain the battery. However, with a lithium-ion (Li-ion) battery-powered machine, this costly, time-consuming practice is eliminated.

Where to buy lithium batteries?

Where you buy your lithium batteries will likely depend on the application and type of battery you need. For instance, you can find AA lithium batteries in most brick-and-mortar stores. But 12-volt deep-cycle lithium marine batteries and RV lithium batteries aren't as commonly found.

Can Inventus power convert your equipment to Li-ion battery power?

Inventus Power is collaborating with OEMs to help them convert their equipment to Li-ion battery power. As a part of our "Electrified by Inventus Power" initiative, this year at ARA we partnered with Columbia Vehicle Group to showcase their new lithium Utilitrucks, electrified by our PROTRXion(TM) batteries.

Les batteries lithium-ion ont une densité d'énergie d'environ 150 à 250 Wh/kg, tandis que les batteries au plomb sont, la plupart du temps, entre 30 et 50 Wh/kg, les batteries au nickel-cadmium entre 40 et 60 Wh/kg et les batteries nickel-hydrure métallique entre 60 Wh/kg et 120 Wh/kg. Plus la densité d'énergie est élevée, plus l'appareil fonctionne longtemps sans augmenter sa ...
