

# Riga Energy Storage Station Environmental Assessment Public Notice

The Secretary of State for Energy Security and Net Zero ("the Secretary of State") gives notice under regulation 31(2) of the Infrastructure Planning (Environmental Impact Assessment) Regulations 2017 that a determination has been made on an application made by Net Zero Teesside Power Limited and Net Zero North Sea Storage Limited ("the Applicants") ...

Investment planning and short-term operation optimization of storage power plants under day-ahead market conditions is researched in this paper. It can be considered as the pre-feasibility study of storage power plant projects. Two options of energy storage are assessed: pumped-storage hydropower and hydrogen storage.

Riga city has been struggling in improving the housing sector energy efficiency and energy poverty. It is estimated that there are about 6000 buildings in need of deep renovation. Although the share of renewable energy sources in city centralized heating system in 2020 was 31,8%, there is a need for zero emission technologies in heat supply.
