

Riyadh New Energy Battery Brand Introduction

Saudi Arabian investment company Energy Capital Group has announced a collaboration with US tech startup Pure Lithium to develop renewable batteries. The batteries will use lithium extracted from oilfield brines, giving a further boost to Saudi Arabia's plans to dominate in green industries.

The Saudi government has announced its goal of producing 500,000 EVs by 2030 and making 30% of all vehicles on the road in Riyadh electric. Besides developing its domestic chemicals-to-EV supply chain, Saudi Arabia invests in key overseas mining assets to secure critical mineral supply.

The Saudi government has announced its goal of producing 500,000 EVs by 2030 and making 30% of all vehicles on the road in Riyadh electric. Besides developing its ...

In celebration of its launch, Al-Futtaim Electric Mobility Company and BYD orchestrated a groundbreaking, multi-city event across Saudi Arabia on February 20th, heralding BYD"s ...

Saudi Arabia has set ambitious goals for itself, including producing 500K EVs by 2030 and making 30% of all vehicles in Riyadh electric, all while investing in various overseas mining assets. Morocco, on the other hand, aims to become an EV battery-making hub ...

Saudi mining giant Ma"aden and US-based Ivanhoe Electric said this year they will start exploring for lithium and other rare metals inside the kingdom. And Saudi investment company Energy Capital Group said in September it was backing a US tech startup called Pure Lithium to develop batteries using lithium extracted from oilfield brines.

However, with the company being relatively new and its product range still largely unfamiliar in this region, I was obliged to explore the brand further and meet the people behind it. So, I ...

The evolution of cathode materials in lithium-ion battery technology [12]. 2.4.1. Layered oxide cathode materials. Representative layered oxide cathodes encompass LiMO2 (M = Co, Ni, Mn), ternary ...

However, with the company being relatively new and its product range still largely unfamiliar in this region, I was obliged to explore the brand further and meet the people ...

When choosing a high-rate battery for your application, it is important to evaluate the discharge time required, environmental temperatures, electrical load requirements for power and energy, overall battery life required, and if the battery will be stationary or mobile. It is common for high-rate batteries to identify their nominal power in watts per cell. The watts per cell (W/cell) ...
