

Rooftop Solar Guarantee

Will the EU rooftop solar standard drive more rooftop solar capacity?

According to our analysis, the EU Rooftop Solar Standard within the EPBD could drive the installation of 150 to 200 GW of additional rooftop solar capacity in the EU between 2026 and 2030. Critically, the Solar Rooftop Standard will unlock the potential of large rooftops such as those installed on offices, commercial buildings, or car parks.

Can rooftop solar PV reach a new national target?

But there remains a substantial amount of work to be done to accelerate the deployment of rooftop solar PV to reach the current National target of 3 GW to 5 GW per year of new capacity set by the 10-year Energy Programme Decree (PPE).

When will rooftop solar be available in Europe?

The president of the European Commission, Ursula von der Leyen, has announced a mandate for rooftop solar on commercial and public buildings by 2027, and for residential buildings by 2029. The EU target for renewable energy has been increased from 40% to 45%.

What is the solar rooftop standard?

The Solar Rooftop Standard will most importantly unlock the potential of large rooftops such as those installed on offices, commercial buildings, or car parks. Certain buildings such as agricultural and historic structures may be excluded. Osenberg continues: "Rooftop PV needs to be the gateway to smart electrification.

What is the rooftop solar PV comparison update?

The Rooftop Solar PV Comparison Update produced by CAN Europe and eco-union, with contributions from our members, is an updated version of the Rooftop Solar PV Comparison Report published by CAN Europe in May 2022.

How big is rooftop solar in Europe?

Total rooftop solar capacity in Europe stood at more than 170 GW at the end of 2023 and is expected to grow to 355 GW by the end of 2027. In addition to the obligatory solar installations under the Solar Standard, the growth of rooftop solar on homes is also likely to increase, as citizens seek to shield themselves from fossil price volatility.

By examining the progress made and challenges faced, the report aims to provide a comprehensive overview of the current state of residential rooftop solar PV adoption across the EU, offering insights, ...

In contrast, financial incentives for rooftop solar in Germany, including the Solarstrombonus feed-in tariff, are substantially more generous. Reforming the Smart Export Guarantee in the UK to deliver higher fixed-rate payments could unlock substantial investment in rooftop solar by guaranteeing long-term profitable returns for

Rooftop Solar Guarantee

new installations.
