Solar Mixing Valve Interface

What is a solar rated mixing valve?

Inta's solar rated mixing valves are designed to reduce the temperature of solar heated domestic hot water to safe, usable temperatures for the end user.

What is a blending valve?

These valves have been specifically designed to function with a constant high temperature hot water supply, something conventional blending valves are not able to cope with as well as having high flow rates making them ideal for installation in conjunction with domestic hot water cylinders. Need Help?

What is a low pressure blending valve?

These valves have been specifically designed to function with a constant high temperature hot water supply, something conventional blending valves are not able to cope with. Inta's low pressure blending valves are ideal for installations where low pressure loss and high flow rates are a must.

Inta's low pressure solar rated mixing valves are designed to reduce the temperature of solar heated domestic hot water to safe, usable temperatures for the end user. These valves have ...

These Vernet Solar thermostatic mixing valves actuators have been specifically designed to function with a constant high temperature hot water supply with high flow rates making them ideal for installation in addition with domestic hot water cylinders. Deliver solar heated water at safe temperature. High or low pressure systems. Help prevent scalding. You have a specific ...

In order to protect solar panels, a safety valve and an expansion tank should be installed in the circuit. The valve can also be used for protection of any solar tank. The safety valve limits hot water pressure in such a way as not to exceed the calibrated set limit.

Thermostatic mixing valve for solar systems Used to maintain the outlet water temperature constant even if the inlet conditions vary (pressure and temperature) Designed to withstand ...

Inta's low pressure solar rated mixing valves are designed to reduce the temperature of solar heated domestic hot water to safe, usable temperatures ...

Inta's solar rated mixing valves are designed to reduce the temperature of solar heated domestic hot water to safe, usable temperatures for the end user. These valves have been specifically designed to function with a constant high temperature hot water supply, something conventional blending valves are not able to cope with as well as having ...

Key Features: Model LK550 High performance 3-way mixing with low pressure drop Easy adjustment of

SOLAR PRO.

Solar Mixing Valve Interface

desired water temperature between 38? - 65? 22mm compression fittings for easy installation Durable DZR brass body Non-return valve included Long life maintenance free design. Up to 10Bar pressure and 90? water temperature. A must for solar water heating ...

Thermal Mixing Valves . Our range of solar thermostatic mixing valves includes valves suitable for pressurised systems or gravity and pressurised systems. Solar Check Valves . Check valves are critical in preventing damage to the heating system, as they prevent the reverse flow of fluid. Our range's most popular check valve is the ¾" BSP Solar, suitable for high temperature solar ...

The electronic mixing valve is used in centralised systems that produce and distribute hot water for domestic use. This particular series of electronic mixing valves is equipped with a specific regulator that controls a set of thermal disinfection programs for the circuit to combat Legionella.

The Caleffi 2522TMF series thermostatic mixing valve is suitable for point-of-use application and multiple outlet applications in systems where hot water is stored and delivered to outlets at ...

Solar-boiler interface unit. Product code. T16. Thermostatic mixing valve for solar systems. Product code. T22. Thermostatic mixing valve for solar systems. Explore all categories. Household products. See all. Industrial products. See all. Solar systems. See all. Biomass, anti-dewing. See all. Information. about certifications technology production contact. products. ...

The thermostatic mixing valve is used in systems that produce domestic hot water. Its function is to maintain the temperature of the mixed water supplied to the user constant at the set value despite variations in the hot and cold water supply conditions at the inlet.

The Caleffi 2522TMF series thermostatic mixing valve is suitable for point-of-use application and multiple outlet applications in systems where hot water is stored and delivered to outlets at very high temperature.

Thermostatic mixing valve for centralised solar thermal systems. Thermostatic mixing valve with interchangeable cartridge for solar thermal systems. Main navigation

Electronic mixing valve with thermal disinfection - 230 V; Electronic mixing valve with thermal disinfection - 24 V; Hybrid electronic mixing valves; Spare parts for electronic mixing valve with thermal disinfection, flanged connections - 230 V; Spare parts for electronic mixing valve with thermal disinfection, flanged connections - 24 V

Inta's low pressure solar rated mixing valves are designed to reduce the temperature of solar heated domestic hot water to safe, usable temperatures for the end user. These valves have been specifically designed to function with a constant high temperature hot water supply, something conventional blending valves are not able to cope with ...
